

Team Status Report 2 (10/21 - 10/28)

Section 1 [Goals from last week]

Short-term plans

- Plan and began development of front-end, most likely using a bootstrap
- Implement GitHub Projects to set micro-goals for our project

Long-term plans

- Use git to deploy our web app
- Begin implementing some functionality with ruby and our front-end

Section 2 [This week's progress]

What we've completed

- Implement GitHub Projects to set micro-goals for our project
- Started to implement Bootstrap; login page and courses list page.

What we've worked on

- Scheduling a group meeting over the weekend to start on full bootstrap implementation and start working on the back end.

What we've learned

- Bootstrap-- we found our theme and how to implement it in our code.

What we've had trouble with

- Finding the right bootstrap and deciding on how to exactly start the project.

What we've been stuck on

- N/A

Section 3 [Next week's prospects]

Short-term plans

- Finish implementing Bootstrap; create 'write a review' page, and an updatable page that displays based on what course the user clicked on from the courses list.
- begin to code ruby functions.

Long-term plans

- Implement Ruby
- Design the Database

Section 4 [next meeting with TA]

TA was not found in class. Emailed them to schedule a meeting.
