Marlon Mejias
October 11, 2019

1. Project problem description.

The goal of this project is to offer a safe, convenient platform for CCI students to leave and read meaningful reviews on classes and professors at UNCC

2. Identify all of the stakeholders for your project.

The possible stakeholders are UNCC professors, students and future students.

3. User stories

As a user I want to be able to read and post meaningful reviews about UNCC CCI classes so that I can make an informed decision on which classes I will take.

4. Wireframe diagrams
